

Q4 - To-Do List Program Guide

Python Solution (todo.py)

```
def add_task(tasks, task):
    tasks.append(task)

def remove_task(tasks, task):
    if task in tasks:
        tasks.remove(task)

def clear_tasks(tasks):
    tasks.clear()

if __name__ == "__main__":
    tasks = []
    add_task(tasks, "Submit assignment")
    print(tasks)
```

Expected Output

```
['Submit assignment']
```

Git Commands

```
git add .
git commit -m "Added Q4 To-Do List Program"

git checkout -b feature-remove-task
# Add remove_task()
git add .
git commit -m "Added remove_task function"

git checkout main

git checkout -b feature-clear-tasks
# Add clear_tasks()
git add .
git commit -m "Added clear_tasks function"

git checkout main

git log --oneline --graph --all

git merge feature-remove-task
git merge feature-clear-tasks

git push origin main
```
