

Q3 - String Length Checker Guide

Python Solution (strlen.py)

```
def count_vowels(s):
    return sum(ch.lower() in "aeiou" for ch in s)

def count_consonants(s):
    return sum(ch.isalpha() and ch.lower() not in "aeiou" for ch in s)

def count_uppercase(s):
    return sum(ch.isupper() for ch in s)

if __name__ == "__main__":
    print(count_vowels("programming"))
```

Expected Output

3

Git Commands

```
git add .
git commit -m "Added Q3 String Checker"
git checkout -b feature-consonants
# Add count_consonants()
git add .
git commit -m "Added consonant count"
git checkout main
git checkout -b feature-uppercase-count
# Add count_uppercase()
git add .
git commit -m "Added uppercase count"
git checkout main
git log --oneline
git merge feature-consonants
git merge feature-uppercase-count
git push origin main
```
